CR MAPS + Zinc

GUARANTEED ANALYSIS (w/v)				APPLICATION RATE	
CR MAPS + Zinc				CR MAPS + Zn	MAP
Nitrogen 8%	Sulphur 5%	10 L	= 40 kg
Phosphorous10%	Zinc0.25%		

CR MAPS + Zinc is a liquid soil fertilizer that provides controlled release of nutrients via microbial decomposition & chelation. The unique tri-polymer nitrogen & phosphorous formulation is first utilized as an energy source by soil microbes and nutrients are then released in plant available form. The addition of sulphur also enhances microbial activity & nutrient availability while the zinc is fully plant available.

- ▶ Provides quick, medium & long term release of nutrients
- ▶ No leaching or volatilization of nitrogen
- ▶ Non-acidifying & environmentally friendly
- ▶ Remains in a plant available form regardless of soil conditions (P will not be “locked up” on high pH calcareous soils)
- ▶ Liquid formulation suitable for fertigation & foliar application
- ▶ Promotes microbial proliferation, humus production & nutrient release
