Liquid Fully Chelated Lignin Fertilizer™

ZINC PLEX

ANALYSIS	w/v%
Zinc (as lignosulphonate)	11.0

Supply available nutrients to your soil & also ideal for foliar application in slower growing crops such as citrus & cereals.

COMPATIBILITY:

All PLEX formulations are compatible with each other except Boron PLEX & Phos PLEX (These two products should be applied separately). Please contact SJB Tech Support before mixing PLEX products with non-PLEX fertilizers.

GENERAL INFORMATION:

This product is chelated (protected from becoming unavailable) with naturally occurring Lignin compounds to provide maximum foliar & root absorption.

CONDITIONS OF SALE:

The Manufacturer warrants that this chelated nutrient product contains the active constituents and chelating compounds, as specified, and it is for the purpose of supplying the appropriate major nutrient or correcting micro-nutrient deficiency, when used in accordance with directions under normal conditions of use. No one, other than the officer of the Manufacturer, is authorised to make any warranty, guarantee or direction concerning the product as the time, place, rate of application and other conditions are beyond the control of the Manufacturer.

APPLICATION RATES:

General Rate: 1 L of ZINC PLEX is equivalent to 3-4 kg zinc sulphate (heptahydrate).

SOIL APPLICATION: 2 L/ha at emergence or prior to bud-burst & repeat 4 weeks later. For trees & vines also apply 2 L/ha post-harvest.

FOLIAR APPLICATION: Cereal & pulses: 1 L/ha at 5 leaf stage. **Citrus:** 3 L/ha during spring & autumn flushes.

Vines: 2 L/ha at 10 cm shoots & repeat 14-21 days later.

RECOMMENDATIONS:

The PLEX range has been formulated for soil application via fertigation systems. PLEX products can also be used as foliar fertilizers in slower growing crops where speed of nutrient correction is not as critical.

SAFETY DIRECTIONS:

Avoid contact with skin and eyes and avoid breathing in vapour or spray mist.
