

# SPECIALTY LIQUID NUTRIENT PRODUCTS

## CR MAPS + Zinc

**8-10-0-5 + Zn 0.25%**

- ▶ Provides immediate & longer term release of nutrients
- ▶ Phosphorous 5-10 times more available than conventional forms
- ▶ Non-acidifying & environmentally friendly
- ▶ Remains in a plant available form regardless of soil conditions (P will not be “locked up” on high pH calcareous soils)
- ▶ Liquid formulation ideal for fertigation
- ▶ Promotes microbial proliferation, humus production & nutrient release
- ▶ Excellent & safe liquid P starter or pop-up fertilizer option

CR MAPS + Zinc is a unique liquid soil fertilizer that provides immediately available P on a wide range of soil types. The polymer forms of nitrogen & phosphorous are also readily utilized as an energy source by soil microbes that provide further release of plant available nutrients. The addition of sulphur increases phosphate availability while the chelated zinc further enhances germination.

**General rate: 10-20 L/ha to replace 25-50 kg/ha MAP. Fertigation: 10 L/ha every 14 days. Injection at planting: 10-15 L/ha.**
