# CR PHOSIKA PLUS

Get CONTROL of Phosphorous uptake!

**Guaranteed analysis (w/v) – P 15%, S 5%**

- ▶ 10-20 times more efficient than conventional phosphorous fertilizers
- ▶ Liquid formulation ideal for fertigation
- ▶ Inclusion of sulphur to enhance crop utilization of phosphorous & other soil nutrients
- ▶ Excellent binding properties to minimize leaching on sandy soils
- ▶ Ideal for crops such as potatoes, onions & young vines that have small root systems that limit P uptake

Even after heavy fertilizer application, soil phosphorous availability is limited on most soil types due to lock-up with calcium (high pH) or iron/aluminium (low pH). Supplying P at an early stage in a form the crop can utilize will stimulate root growth & increase the crops access to P already present in the soil.

## APPLICATION

Apply 25-50 L/ha prior to planting.

CR PHOSIKA PLUS @ 10 L will replace 50-100 kg of Double Super.
