KICK START P

**Phosphorous (P) 6%, Zinc (Zn) 4%, Manganese (Mn) 3%
Copper (Cu) 0.1%, Molybdenum (Mo), 0.1%, Cobalt (Co) 0.1%**

Increase your farm profitability without significant cost

- ▶ User friendly liquid formulation that can be applied with pickles
- ▶ Absorbed through seed pores during imbibition
- ▶ Contains all essential nutrients for early crop development
- ▶ Enhanced root growth & more even germination/emergence
- ▶ Improved viability of crops in dry seasons
- ▶ Better crop utilization of soil/fertilizer nutrients & moisture
- ▶ Can significantly reduce granular phosphorous fertilizer rates
- ▶ Low cost input (as little as \$15/tonne seed)

KICK START P is most effective on soils with high phosphorous retention (lock-up) such as calcareous high pH soils and acid soils with high iron, aluminium, manganese & organic matter levels. On soils with a good P fertilizer history, KICK START P can supplement granular P application. KICK START P promotes more uniform emergence & development of plants across a paddock which is a significant benefit for post-emergent sprays.

KICK START P Trial Results

Wheat (VIC)				
Treatment	Yield	Protein	Screenings	Yield increase as a % of Control
Control	3.86 T/ha	9.7%	3.5%	100
KSP @ 8 L/T	4.08 T/ha	10.4%	3.5%	106
Lentils (SA)				
Control	2.98 T/ha			100
KSP @ 4 L/T	3.28 T/ha			110

APPLICATION: Cereal & Pulse Crops – 4-8 L/Tonne seed
