

PASTURE CAL

Ca 8%, N 5.0%, Zn 0.25%, B 0.25%

Healthier Soils

Better Pasture Quality

Higher Productivity

PASTURE CAL is a calcium based liquid containing zinc & boron that is aimed at improving soil health and the production of dairy pastures. It contains an organic chelate to protect nutrients from lock-up and enhance foliar & root uptake. Some of the advantages of PASTURE CAL include:

- High level of soil availability & foliar uptake
- Improve soil structure & pasture growth
- Promotes root uptake of soil nutrients (ie. Improves fertilizer efficacy)
- Supplies zinc which is essential for stock reproduction
- Boron enhances calcium uptake as well as legume production
- Easy to apply liquid formulation
- Cost effective calcium source when lime/gypsum application is not practical

Application

5-10 L/ha pre or early post sowing & repeat with 2-4 L/ha LIG-PASTURE or 5-20 L/ha VLP following each grazing for growth boost. Alternatively apply 10-100 L/ha in the pre-plant to pre-emergence period.

Container Sizes

PASTURE CAL is available in 200L & 1000L returnable shuttles.

Other Products

Ask us about our foliar nutrient alternatives such as LIG-PASTURE (N 2.0%, S 3.0%, Zn 2.0%, Cu 1.0%, B 0.5%, Mo 0.1%, Co 0.05%). LIG-NIT (N 32%) & VLP (10-2-7 + trace elements).
