

VLP[®]

Enhancing The Value Of GA Pasture Sprays

VLP is a complete nutrient spray that uses a unique organic chelating agent to optimize foliar absorption & nutrient availability to the plant. Some of the advantages of VLP include:

- Immediate foliar uptake and rain-fastness
- Stimulates growth in cold or wet soil conditions
- Promotes root uptake of soil nutrients (ie. Improves fertilizer efficacy)
- More economic & faster acting than equivalent rates of granular fertilizers
- Compliments GA sprays by producing a healthier, greener pasture
- Easy to apply liquid formulation compatible with GA
- Complete balance of essential nutrients for good pasture health

Application

5-20 L/ha with GA sprays. Recommended water rates for boom application are 50-100 L/ha. For optimum efficacy of both products ensure tank water pH is acidic (<7.0). *Not compatible with Igran[®] & Agtryne MA[®]. If applying VLP higher than 5 L/ha with Amicide 625[®], use LIG-BUFFER @ 75-100mL/100 L water.

Analysis

10-2-7-0.5 + Mg 0.5% & trace elements.

Container Sizes

VLP is available in 20L, 200L & 1000L returnable shuttles.

VLP[®]

Greener Grass with more Guts & Grunt!

“I had more pasture in winter last year (2008) than I did in spring and it was all down to those sprays”.

Adam Waasdorp
Waaia Dairy farmer, talking about VLP & ProGibb[®].

Feed your livestock and your pastures at the same time with

LIG-PASTURE

Supplies **essential** nutrients for animal health & pasture growth including zinc, copper, cobalt & selenium.

Foreground: Sub & ryegrass pasture treated with ProGibb @ 20g/ha + VLP @ 5 L/ha. Background: ProGibb @ 20 g/ha.

Cheaper & Easier than Urea!

“I wouldn't have got half the feed I had last year (2008) without ProGibb[®] and VLP”

Brendan Wardle
Katandra West Dairy farmer.
