

SPECIALTY LIQUID NUTRIENT PRODUCTS

Cotton Foliar Nutritionals

GREENA (11-0.5-6 + Awaken & NutriSync D)

- Unique tri-nutrient formulation technology
- Stimulates root development
- Promotes vegetative growth
- Aids recovery of stressed crops
- Improves fertilizer efficiency via increased root uptake of soil nutrients.

APPLICATION – 2-3 L/ha or 5-10 L/ha in stress situations

LIG-K + BORON (K 10%, B 2%)

- Potassium & boron complex proven to increase cotton yields
- Provides available potassium for boll fill
- Boron promotes sugar movement & boll fibre quality
- Excellent compatibility

APPLICATION – 5 L/ha at 1st square & repeat during early and late boll fill

Zn-COTT (Zn 10%, P 4%)

- Glyphosate compatible zinc
- Enhances vegetative growth
- Provides essential nutrients to optimise flowering & boll set
- Cost effective

APPLICATION – 2-3 L/ha

Note: Do not apply during flowering.

VLP (10-2-7, 0.5 Mg + traces)

- Complete balanced nutrient formulation
- Fully chelated for efficient uptake
- Promotes growth & aids crop recovery
- Available with help to reduce crop stress
- Excellent compatibility
- Cost effective.

APPLICATION – 2-3 L/ha or 5-10 L/ha in stress situations
